**Single Seal Containment**

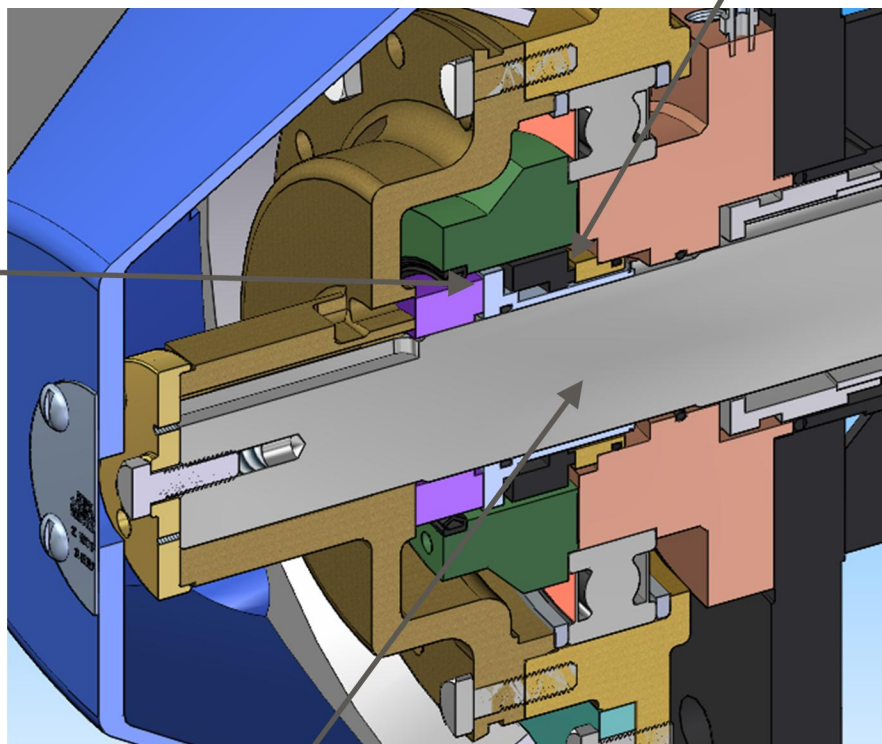

# Series 400

## Single Seal Containment

Jensen Mixers International Inc. is proud to introduce the single seal positive containment system for the Jensen 400 Series mixers—an environmentally safe system for today's environmentally conscious customer.

Standard Jensen mechanical seal. Available in standard and exotic materials.

The positive containment system is gravity lubricated from the external seal pot. In the event of seal failure, the system is designed to accept maximum tank head pressure without losing containment. Sensory feedback systems to alert of seal failure are available.

Jensen 480 and 450 series mixers can be retrofitted in the field **without** the need for welding or drilling.

### LIMITED WARRANTY

Jensen Mixers are warranted against defects in materials or workmanship for a period of 12 months following date of purchase. This warranty is limited to replacement or repair of the agitator by Jensen only and does not cover consequential damages, removal, freight or re-installation. Electric motors are warranted by their respective manufacturers and are excluded from Jensen warranty.
